Request for Probate Exemplification Documents – Erini Stiliano Estate
Probate Ref C4396

As per phone communication of 27 Oct 2006 could you please issue an Exemplification of probate document.

The reason for the request is that my Melbourne based Greek lawyer requires it for the purposes of making a claim in Greece. He is an expert in both Greek and Australian jurisdictions and has advised me that this is the document I must obtain from the Probate Registry.

The Executor's solicitor has sent me a letter dated 24 Oct 2006 stating anything to with Greece has to be dealt with independently by myself and any other estate claimants, and stated that the solicitor and Executors will play no further role in Australia or Greece (as Executors) with regard to Greek inheritance. In Greece Australian 'Executors' and are seen as potential claimants only – they as claimants have been advised to seek their own solicitors.

In Greece stamp duty is paid when transferring title to 'Executors', and stamp duty is paid again transferring back to the beneficiary – that's why there are rarely 'Executors' in Greece. In Australia stamp duty is not paid when transferring title to Executors. In Greece transfer of title invariably goes directly to the beneficiaries, and not via an Executor.

The Greek government will consider as mandatory all the children of the testator (my mother) under their inheritance laws – Greek law does not depend on a challenge as in the case of Australian inheritance laws.

The Australian solicitor (Treloar & Treloar) has stated that there is to be no communication with her on anything to do with Greece.

My personal details are:
